

SUBHAM SOURABH

LEAD FULLSTACK ENGINEER

Delhi NCR, Haryana 122017 | +91-9903657484 | sourabh.shubham120@gmail.com | linkedin.com/in/subham-sourabh-5b07b110b | github.com/subhamsourabh265 | about-subham.web.app

PROFESSIONAL SUMMARY

Results-driven Lead Fullstack Engineer with **9+ years of** experience architecting scalable enterprise web applications, micro frontends, and cloud-integrated fullstack solutions. Deep expertise in **React**, **Angular**, and **TypeScript**, with hands-on experience across Node.js, NestJS, GraphQL, and Spring Boot backends, RESTful API design, and cloud infrastructure across AWS and GCP. Proven track record of owning technical initiatives end-to-end — from architecture decisions to delivery — lifting user conversion from 80% to **90%**, embedding GenAI and Agentic AI workflows responsibly into engineering practice, and mentoring cross-functional teams through code review, architectural guidance, and AI-assisted development.

CORE TECHNICAL SKILLS

- Languages:** JavaScript, TypeScript, HTML5, CSS3/SCSS, Java, Python, Node.js
- Frameworks & Libraries:** React, Angular, React Native, Nest.js, Spring Boot, jQuery
- State Management:** RxJS, Angular Signals, NgRx
- Architecture:** Microservices, Micro Frontends, Module Federation, Nx Monorepo, Standalone Components, Kafka, RabbitMQ
- Backend & Data:** Node.js, NestJS, GraphQL, REST APIs, SQL, MongoDB, DynamoDB, Firestore
- Cloud & DevOps:** AWS (Lambda, DynamoDB, ECS, CodeBuild, CodePipeline, CloudFormation, CloudWatch, Systems Manager), GCP, Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, Unleash
- Security & Identity:** OAuth 2.0, OIDC, SAML, JWT, Azure AD, ForgeRock, **Angular** Route Guards, npm audit, Dependabot
- Monitoring & Observability:** AWS CloudWatch, Datadog, Kibana
- AI Tooling:** GitHub Copilot, OpenAI Codex, Claude, GPT, RoVo AI, IBM Watson, Agentic AI workflows, AI-assisted development
- Practices:** System Design, Design Patterns, SOLID Principles, Accessibility, Performance Optimization, Agile/Scrum
- Testing:** Jasmine, Jest, Playwright, Vitest, JUnit, Mocha, Chai
- Tools:** JIRA, Confluence, Git, SVN, Visual Studio Code, IntelliJ, Postman, SonarQube

KEY ACHIEVEMENTS

- Modernized legacy application architecture with lazy-loaded components and **Angular** Signals for zoneless change detection, materially reducing bundle size and improving runtime performance.
- Advised client leadership on technical debt reduction, proposing and executing zoneless reactivity and lazy-loading strategies that improved Core Web Vitals.
- Redesigned authentication and onboarding architecture around streamlined decision trees, reducing friction and lifting completion rates for a major automotive-finance client.
- Set engineering-wide code review standards, achieving **100%** unit test coverage across delivery teams using Jasmine and Jest.
- Mentored engineers on Agentic AI and AI-assisted development tools, accelerating workflow execution and improving code quality team-wide.
- Presented architecture decisions and delivery milestones to client leadership during Sprint Reviews, aligning engineering strategy with business priorities.

PROFESSIONAL EXPERIENCE

Lead Software Engineer – Frontend

Publicis Sapient

Aug 2021 – Present

Gurgaon, India

- Architected enterprise-grade solutions using **Angular** and a modern frontend stack, reducing bundle sizes and enabling independent modular deployments.
- Spearheaded performance optimization and redesign of authentication/onboarding flows, lifting account-creation conversion from 80% to **90%**.
- Cut call-center support requests by **50%** by redesigning UX flows and optimizing platform performance.
- Led integration of Unleash for dynamic feature management, reducing AWS Parameter Store read load and eliminating redeployments for feature-flag toggles.
- Strengthened end-to-end and unit testing coverage by introducing Playwright and Vitest alongside existing Jasmine/Jest suites, improving confidence across critical user flows.
- Contributed to infrastructure automation using Terraform and Kubernetes across AWS and GCP environments, supporting scalable, independently deployable services.
- Integrated GenAI and agentic AI solutions into business workflows, automating routine tasks and improving the digital experience.
- Led the integration of Agentic AI tools, including OpenAI Codex and GitHub Copilot, into the team's coding workspace to accelerate day-to-day development workflows.
- Automated repetitive engineering tasks — boilerplate generation, code review assistance, and test scaffolding — freeing engineers to focus on higher-value architecture and feature work.
- Established CI/CD pipelines for frontend builds with enforced code-quality gates and automated testing, reducing regression defects.
- Led cross-functional teams on delivery methodology and mentored engineers on **Angular/React** best practices.

Software Engineer

Tata Consultancy Services

Jan 2017 – Aug 2021

Kolkata, India

- Led modernization of a legacy Adobe Flex application, migrating it to **Angular** to improve performance and maintainability.
- Built a high-performance Connect Portal for SBI Card, driving a 60% increase in customer traffic.
- Developed an online dispute-resolution portal for SBI Card, cutting call-center inquiry load by 30%.
- Developed responsive, high-performance web applications using **Angular**, **TypeScript**, **CSS3**, and **JavaScript** (ES6+).
- Engineered reusable UI component libraries and design systems, standardizing consistency across projects.
- Defined frontend architecture, coding standards, and component patterns adopted org-wide.
- Mentored junior developers transitioning into **Angular**, **TypeScript**, and core **JavaScript** (ES6+), accelerating team onboarding and code quality.

KEY PROFESSIONAL PROJECTS

Customer Relationship Management (CRM) Platform — Capstone Project | *Publicis Sapient — Full Cycle Engineering Program*

Built a full-stack CRM application as the capstone project for Publicis Sapient's Full Cycle Engineering certification program, architected around a micro-frontend UI and a microservices backend to demonstrate end-to-end ownership across the stack.

- Designed and implemented a micro-frontend architecture using **React** and Module Federation, enabling independently built and deployed feature modules.
- Built backend microservices using NestJS, exposing REST APIs consumed by the **React** frontend.
- Containerized services with Docker and provisioned infrastructure using Terraform, applying infrastructure-as-code practices across the deployment pipeline.

Skills: *React, NestJS, TypeScript, JavaScript, HTML/CSS, Docker, Terraform, Microservices, Micro Frontends, Module Federation, REST APIs, Git*

Admin Portal — Modernization / Identity & Access Management | *Publicis Sapient*

Modernized a legacy admin portal from PHP pages to **Angular 21**, adopting lazy loading and signal-based reactivity to improve application performance. Strengthened application security by integrating Azure AD through MSAL.js for authentication, authorization, and role-based access control.

Skills: *Angular 21, JavaScript, TypeScript, HTML, SCSS, Azure AD, MSAL.js, AWS CloudWatch, AWS CodeBuild, AWS ECS, AWS CodePipeline, Docker, SonarQube, Git*

Universal Access | *Publicis Sapient*

Led integration of ForgeRock into AA's web and mobile applications for Single Sign-On, logout, password change/reset, login email change, account registration, and account association — enabling speedy onboarding for new users.

- Contributed to lifting conversion to **95%** by integrating optimized ForgeRock trees and streamlining the onboarding flow.
- Reduced call-center support volume by implementing account reassociation directly through the web app.

Skills: *Angular 21, HTML5/CSS3, TypeScript, JavaScript, Java 8, Spring Boot, ForgeRock, AWS ECS, AWS CodePipeline, AWS CodeBuild, Cloudflare, SonarQube, GitHub*

Your Account | *Publicis Sapient*

A web application that allows users to review and manage their linked insurance policies.

- Increased traffic by redesigning the Your Account web app with lazy-loaded routes and a UX overhaul.
- Implemented new add-on products, driving a significant share of overall traffic through the new offerings.

Skills: *Angular 19, HTML5/CSS3, TypeScript, JavaScript, Java 8, Spring Boot, ForgeRock, AWS ECS, AWS CodePipeline, AWS CodeBuild, Cloudflare, SonarQube, GitHub*

Your Account Renewals | *Publicis Sapient*

Allows users to review and modify their linked policies to renew or auto-renew coverage.

- Increased traffic by redesigning the Renewals web app with lazy-loaded routes and a UX overhaul.

Skills: *Angular 21, HTML5/CSS3, TypeScript, JavaScript, Java 8, Spring Boot, ForgeRock, AWS ECS, AWS CodePipeline, AWS CodeBuild, Cloudflare, SonarQube, GitHub*

Citiplanner & Citiwatch Migration | *Tata Consultancy Services*

Migrated a legacy Adobe Flash application to a modern **Angular** web application.

- Designed the frontend architecture and led the application build from the ground up.
- Helped increase user traffic following the migration.

Skills: *Angular 11, HTML5/CSS3, TypeScript, JavaScript, GitHub, SonarQube*

Online Dispute Portal | *Tata Consultancy Services*

An online dispute-resolution portal built for SBI Card credit card users.

- Helped reduce call-center load by **50%**.

Skills: *Angular 8, HTML5/CSS3, TypeScript, JavaScript, SVN, SonarQube*

Willow | *Tata Consultancy Services*

An IBM Watson-based chatbot built for internal use by Woodside employees. Worked as a reliability engineer.

Skills: *Node.js, Angular, AWS Lambda, AWS CloudWatch, Datadog, Kibana*

EDUCATION

Bachelor of Technology, Information Technology

Jul 2016

Techno India, Kolkata

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Certified Full Cycle Engineer — Publicis Sapient
- Certified NFR Web Specialist — Publicis Sapient

AWARDS & RECOGNITION

- AA Distinguished Award — AA Client & Publicis Sapient
- TCS Gems Award — Tata Consultancy Services
- Best Team Award — Tata Consultancy Services
